- As of January 1, 2016 the Panama Registry committed with the reduction of greenhouse emission is implementing a special three (3) year discount for ships, this will apply to the vessels already registered or vessels to be register in our National Merchant Marine. To apply for this discount the applicant must present evidence the implementation of corporate social responsibility programs focused on the reduction of air and sea pollution from shipping. This discount will apply regardless the tonnages or age of the vessels and it could be renewed.

10. To apply for this kind of discount, the application must evidence one of the following situations:

- a. That the obtained Calculated Attained Energy Efficiency Design Index (Attained EEDI) is equal to or less of the Calculated Required Energy Efficiency Design Index (Required EEDI), depending on the applicable phase established on Regulation 21, Annex VI, MARPOL, as follows:

Phase 1:

- From January 1st, 2015 until December 31st, 2019 the obtained Calculated Attained Energy Efficiency Design Index (Attained EEDI) is equal to 60% or less of the Calculated Required Energy Efficiency Design Index (Required EEDI).

Phase 2:

- From January 1st, 2020 until December 31st, 2024 the obtained Calculated Attained Energy Efficiency Design Index (Attained EEDI) is equal to 50% or less of the Calculated Required Energy Efficiency Design Index (Required EEDI).

Phase 3:

- From January 1st, 2025 the obtained Calculated Attained Energy Efficiency Design Index (Attained EEDI) is equal to 40% or less of the Calculated Required Energy Efficiency Design Index (Required EEDI).

This requirement can be fulfilled by presenting copy of the International Energy Efficiency Certificate (IEEC) or Statement from the Recognized Organization indicating the values resulting from both calculations (Attained EEDI and Required EEDI); or

- b. That the ship is powered entirely by Liquefied Natural Gas as fuel; or
- c. That an Energy Efficiency Operational Indicator (EEOI) has been established as a mechanism to achieve the limitation or reduction of greenhouse gas emissions from ships in operation for a specific period of time (at least presenting the last year of EEOI calculation) in order to use it as an objective, performance-based approach to monitoring the efficiency of a ship operation, for the establishment of the EEOI the IMO Guidelines for Voluntary use of the Ship Energy Efficiency Operational Indicator (EEOI) contained in MEPC.1/Circ.684 of 17 August 2009 should be used as a minimum requirement.

The renewal of this discount requires the evaluation of the last 3 years of Energy Efficiency Operational Indicator (EEOI) calculations and results, in order to verify that the ship has contributed to the reduction of CO₂ emissions.

11. Please note that the Eco-Ship Discount does not apply with other kind of discount. Consequently, if the Administration has already granted a discount scheme and the same is in force, then, the applicant shall hold on until the ending of said scheme in order to apply for the Eco-Ship discount.
